

The AME Group is a British Columbia based Mechanical Engineering (Buildings Engineering) consulting company that specializes in sustainable and environmentally responsible design. Projects, located both in the lower mainland and around the world, range from the design of small residential complexes to large hospital and institutional facilities. Our company is a rapidly growing organization that provides competitive salaries and benefits while allowing excellent career opportunities and a great learning and mentoring environment. Our offices are located in both downtown Victoria and Vancouver, offering central locations as well as flexible work hours.

We are currently seeking to fill an intermediate position in our office. Applicants should be motivated, talented, and committed team members. Creative thinking, a proactive attitude, good communication, organizational, and report writing skills are essential.

The position is for recent engineering graduates. At this position, you will be gaining experience in practical engineering skills relative to Plumbing, HVAC, and Fire Protection designs. You will work directly with other engineers and attend project meetings and also complete field review of completed work.

Responsibilities:

- Designing building mechanical systems including HVAC, plumbing, fire protection, building controls
- System design calculations, equipment selection
- Interfacing and meeting with other design professionals for project coordination
- Preparation of contract drawings using AutoCAD
- Incorporate sustainable design strategies
- Computer building simulation modeling

Qualifications:

- Bachelors of Engineering (Mechanical) or Technical diploma in Building Design
- Up to 6 years technical experience (including internships)
- Mandatory REVIT MEP experience

We offer:

- Competitive pay
- Every second Friday off
- Comprehensive health benefits
- Profit sharing
- Potential partnership and/or ownership

Intermediate Design Engineer / REVIT MEP
